

Job Title: Junior PHP Developer (Laravel Focus)

Location: Lucena City, Quezon, PH

Employment Type: Full-time

Company: BLIS Digital Creations

Job Overview:

We are looking for a motivated and eager-to-learn **Junior PHP Developer** with a focus on Laravel development to join our dynamic team. In this role, you will contribute to the design, development, and maintenance of web applications using the **TALL stack** (Tailwind CSS, Alpine.js, Laravel, and Livewire). You will work closely with senior developers and the Tech Lead to enhance your skills, while participating in building robust applications and contributing to the overall success of the project.

Key Responsibilities:

- **Development Support:** Assist in the design, development, and maintenance of web applications using Laravel and the TALL stack.
 - **Collaboration:** Work closely with senior developers and the development team to deliver high-quality features.
 - **Coding:** Write clean, maintainable, and scalable code using **Laravel, MVC, Middleware, and Eloquent**.
 - **Learning:** Continuously improve your knowledge of Laravel and the TALL stack by working on a variety of tasks and receiving mentorship from senior team members.
 - **Troubleshooting:** Assist in debugging and troubleshooting application issues to ensure optimal performance and reliability.
 - **Testing:** Help with testing and ensuring code quality through unit tests and bug fixes.
 - **API Development:** Contribute to building and maintaining RESTful APIs.
 - **Database Management:** Collaborate on database design and work with **MySQL** to ensure data integrity and performance.
 - **Documentation:** Write and maintain clear documentation of the code and processes.
-

Required Skills and Qualifications:

- **1-2 years of experience** in PHP development, with some exposure to the Laravel framework.
 - Familiarity with **Laravel's ecosystem**, including **MVC, Middleware, and Eloquent**.
 - Basic understanding of the **TALL stack** (Tailwind CSS, Alpine.js, Laravel, and Livewire).
 - **Familiarity with databases** like MySQL and basic query building.
 - Basic experience in **building and integrating APIs** (REST, JSON).
 - Understanding of **object-oriented programming** principles.
 - Experience with **version control systems** (Git).
 - **Problem-solving skills** with a strong desire to learn and grow.
 - Ability to **collaborate** effectively with a development team.
 - **Willingness to learn** from senior developers and adapt to new challenges.
-

Preferred Skills:

- Familiarity with **Vue.js** is a plus.
- Basic understanding of **front-end development** and how to work with frameworks like Tailwind CSS.
- Experience working in an **Agile/Scrum/Kanban** environment.
- Exposure to **automated testing frameworks** (e.g., PHPUnit).
